This will not only increase the attraction for debt instruments as an investable asset and add greater liquidity to the Exchange but will also pave the way to enhance the outreach of the debt market. We look forward to building a strong relationship with the Pakistan Stock Exchange and continue to play our role in developing the economy of the country."*

Market Makers perform the crucial role of providing liquidity and depth to the market by facilitating investors to buy & sell securities through continuously quoting two-way prices, i.e., bid and offer prices.
